FOR IMMEDIATE RELEASE

## GREENBELT LAUNCHES REGULATORY & COMPLIANCE PROGRAM

**March 10, 2022 - Los Angeles, CA** - Greenbelt Group, a leading cannabis consulting group, announced today that they were launching a Regulatory & Compliance Program to support their growing client base. Greenbelt has nearly a decade of experience in the regulatory & compliance arena supporting national financial institutions and leading cannabis businesses.

In the cannabis industry, an effective compliance program is increasingly important to operators seeking a form of defensive protection and for the long term viability of the business. Additionally, internal controls to prevent and detect misconduct are attractive to potential investors. If cannabis operators want capital to scale their operation, it is imperative to have a robust and comprehensive compliance program that addresses not only cannabis and hemp regulations, but also employment, intellectual property, securities, environmental, antitrust and other considerations.

*At Greenbelt, our Compliance & Regulatory Program was created to provide our client base with a variety of ala-cart, cost effective options that allow our clients to thrive in an affordable and more efficient way than typical consulting firms.*

*- David Morrow, COO.*

Cannabis operators can now receive different forms of compliance support from Greenbelt's Regulatory & Compliance Team. Whether it is key support prior to an annual inspection, ongoing monthly support for an entire business, or the creation of a complete internal certified compliance program, Greenbelt provides multiple options at varying price points to support cannabis operators, no matter their stage of development.
