FOR IMMEDIATE RELEASE

## CANNABIS MANUFACTURING CONSULTANT TEAM JOINS GREENBELT GROUP

**February 23, 2022 - Los Angeles, CA** - Greenbelt Group, a leading cannabis consulting group, announced today that a Manufacturing and Quality Assurance Consultant Team has joined the consulting firm.

With many years of experience, the Greenbelt Manufacturing & Quality Assurance (MQA) Team has led product innovation, quality control and quality assurance with some of the largest Cannabis companies in the industry - including nationally recognized brands like Curaleaf. The team has provided installations with processing equipment and analytical equipment for sites across the country.

“As the product offering in both medical and adult-use markets across the country continues to evolve, it is imperative that we expand our team to include subject-matter experts in the field of manufacturing and formulation. Onboarding the MQA team will ensure Greenbelt’s ability to properly service operators within every sector of the industry.” - Jordan Thacker, CCO

The MQA team will provide equipment selection and evaluation, product formulation, process development, testing programs and quality assurance of products for Greenbelt clients nationwide. Additionally, they will provide high level assistance with staffing of manufacturing, production, testing, and other personnel.

**About Greenbelt:** Greenbelt Group LLC is a Los Angeles based boutique consulting group dedicated to helping businesses navigate the budding Cannabis industry. Greenbelt’s mission is to empower adult-use recreational Cannabis companies to build and sustain compliant, profitable businesses that are efficient, innovative, and nimble. Understanding the complexities of the ever-evolving landscape, Greenbelt offers a dynamic, turn-key consulting solution for entrepreneurs and businesses seeking to enter and navigate the legal Cannabis industry.
